Functionality

- This project allows users to submit votes for a variety of elections, the amount of elections displayed is based on admins creating said elections.
- Users must login before voting so that
    i. Users have an electoral account
    ii. Users can't repeat vote

Groups

Users

- Users are the voters, they have an account with login details, and have one vote per election

Admins

- Admins create elections and manage details of elections (who can vote, who are the options, etc.)
